Volume 215 1993

Table of contents

No. 1 1–212 issued on July 1, 1993
No. 2 213–512 issued on July 15, 1993
No. 3 513–916 issued on August 1, 1993

Corrections 907

Information for authors 909–915

Contents of Volume 215 I–XI

Reviews

Strategies of antioxidant defense
Helmut Sies 213–219

The peripheral cholecystokinin receptors
Sandrine Silvente-Poirot, Marlène Dufresne, Nicole Vaysse, Daniel Fourmy 513–529

Nucleic acids, protein synthesis and molecular genetics

Molecular cloning and functional characterization of V_2 [8-lysine] vasopressin and oxytocin receptors from a pig kidney cell line
Valentin Gorbulev , Hubert Büchner, Aida Akhundova, Falk Fahrenholz 1–7

Characterization of a marsupial sperm protamine gene and its transcripts from the North American opossum (*Didelphis marsupialis*)
Robert J. Winkfein, Sandra Nishikawa, Wayne Connor, Gordon H. Dixon 63–72

The US-1 element from the gene encoding rat poly(ADP-ribose) polymerase binds the transcription factor Sp1
Frédéric Potvin, René J. Roy, Guy G. Poirier, Sylvain L. Guérin 73–80

Biosynthesis and secretion of human interleukin 2 glycoprotein variants from baculovirus-infected Sf21 cells – Characterization of polypeptides and posttranslational modifications
Eckart Grabenhorst, Bernd Hofer, Manfred Nimtz, Volker Jäger, Harald S. Conradt 189–197

Isolation, characterization and expression of the eclosion hormone gene of *Drosophila melanogaster*
Frank M. Horodyski, John Ewer, Lynn M. Riddiford, James W. Truman 221–228

Primary structure of the human muscle acetylcholine receptor – cDNA cloning of the γ and ε subunits
David Beeson, Martin Brydson, Maria Betty, Steve Jeremiah, Sue Povey, Angela Vincent, John Newsom-Davis 229–238

Ribosomes terminated *in vitro* are in a tight association with non-phosphorylated elongation factor 2 (eEF-2) and GDP
Elena K. Davydova, Nikolai L. Malinin, Lev P. Ovchinnikov 291–296

NMR assignments and solution conformation of the DNA · RNA hybrid duplex d(GTGAACTT) · r(AAGUUCAC)
Andrew N. Lane, Susanne Ebel, Tom Brown 297–306

Distribution of alcohol and sorbitol dehydrogenases – Assessment of mRNA species in mammalian tissues
Mats Estonius, Olle Danielsson, Christina Karlsson, Håkan Persson, Hans Jörnvall, Jan-Olov Höög 497–503

The glucocorticoid receptor acts as an antirepressor in receptor-dependent *in vitro* transcription
Per Eriksson, Örjan Wrange 505–511

Tissue-dependent variation in the expression of elongation factor-1α isoforms: Isolation and characterisation of a cDNA encoding a novel variant of human elongation-factor 1α
Sanne M. Knudsen, Jane Frydenberg, Brian F. C. Clark, Henrik Leffers 549–554

Isoforms of fatty-acid-binding protein in bovine heart are coded by distinct mRNA
Norbert Bartetzko, Axel G. Lezius, Friedrich Spener 555–559

DNA-sequence binding preference of the GC-selective ligand mithramycin – Deoxyribonuclease-I/deoxyribonuclease-II and hydroxy-radical footprinting at CCCG, CCGC, CGGC, GCCC and GGGG flanked by $(AT)_n$ and $A_n \cdot T_n$
Mark L. Carpenter, Jonathan N. Marks, Keith R. Fox 561–566

Molecular characterization of HES-2, a mammalian helix-loop-helix factor structurally related to *Drosophila hairy* and *Enhancer of split*
Makoto Ishibashi, Yoshiki Sasai, Shigetada Nakanishi, Ryoichiro Kageyama 645–652

Human α and β parvalbumins – Structure and tissue-specific expression
Ursula G. Föhr, Barbara R. Weber, Markus Müntener, Werner Staudenmann, Graham J. Hughes, Séverine Frutiger, Denis Banville, Beat W. Schäfer, Claus W. Heizmann 719–727

Identification and analysis of a matrix-attachment region 5′ of the rat glutamate-dehydrogenase-encoding gene
Atze T. Das, M. E. Eva Ludérus, Wouter H. Lamers 777–785

Minimal 16S rRNA binding site and role of conserved nucleotides in *Escherichia coli* ribosomal protein S8 recognition
Marylène Mougel, Christine Allmang, Flore Eyermann, Claire Cachia, Bernard Ehresmann, Chantal Ehresmann 787–792

Protein chemistry and structure

A study of the binding of NADP coenzymes to dihydrofolate reductase by raman difference spectroscopy
Jie Zheng, Yong Q. Chen, Robert Callender 9–16

Localization of two myosin-subfragment-1 binding contacts in the 96–132 region of actin subdomain-1
Jean-Pierre Labbé, Mireille Boyer, Catherine Méjean, Claude Roustan, Yves Benyamin 17–24

Structural change of jack bean urease induced by addition of surfactants studied with synchrotron-radiation small-angle X-ray scattering
Mitsuhiro Hirai, Rika Kawai-Hirai, Toshihiro Hirai, Tatsuo Ueki 55–61

Late-fibrin(ogen) fragment E modulates human α-thrombin specificity
Marie-Christine Bouton, Martine Jandrot-Perrus, Annie Bezeaud, Marie-Claude Guillin 143–149

Interaction of type IV collagen with the isolated integrins α1β1 and α2β1
Andreas Kern, Johannes Eble, Ralph Golbik, Klaus Kühn 151–159

X-ray and primary structure of horse serum albumin (*Equus caballus*) at 0.27-nm resolution
Joseph X. Ho, Eugene W. Holowachuk, Elizabeth J. Norton, Pamela D. Twigg, Daniel C. Carter 205–212

Lipase from *Pseudomonas aeruginosa* – Production in *Escherichia coli* and activation *in vitro* with a protein from the downstream gene
Noriko Oshima-Hirayama, Kazuhiro Yoshikawa, Takaaki Nishioka, Jun'ichi Oda 239–246

^{1}H-NMR analysis of turkey egg-white lysozyme and comparison with hen egg-white lysozyme
Kristin Bartik, Christopher M. Dobson, Christina Redfield 255–266

Studies on the induction and phosphorylation of xanthine dehydrogenase in cultured chick embryo hepatocytes
Andrea Schieber, Dale E. Edmondson 307–314

Stabilized NMR structure of human parathyroid hormone(1–34)
Julian A. Barden, Ruth M. Cuthbertson 315–321

Calcium binding by chick calretinin and rat calbindin D28k synthesised in bacteria
Wing-Tai Cheung, Donald E. Richards, John H. Rogers 401–410

The variants of the protein toxins abrin and ricin – A useful guide to understanding the processing events in the toxin transport
Ramesh Hegde, Anjali A. Karande, Sunil K. Podder 411–419

Affinity labeling of c-H-*ras* p21 consensus elements with periodate-oxidized GDP and GTP
Andreas Löw, Mathias Sprinzl, Heinz G. Faulhammer 473–479

Refolding and single-step purification of porcine interferon-γ from *Escherichia coli* inclusion bodies – Conditions for reconstitution of dimeric IFN-γ
Koen Vandenbroeck, Erik Martens, Sabine d'Andrea, Alfons Billiau 481–486

Site specificity of glycation of horse liver alcohol dehydrogenase *in vitro*
Brian H. Shilton, Robert L. Campbell, Donald J. Walton 567–572

^{1}H- and ^{15}N-NMR assignment and solution structure of the chemotactic *Escherichia coli* Che Y protein
Marta Bruix, Jaime Pascual, Jorge Santoro, Jesús Prieto, Luis Serrano, Manuel Rico 573–585

In vitro formation of a photoreversible adduct of phycocyanobilin and tobacco apophytochrome B
Tim Kunkel, Ken-Ichi Tomizawa, Rainer Kern, Masaki Furuya, Nam-Hai Chua, Eberhard Schäfer 587–594

Folding and assembly of phage P22 tailspike endorhamnosidase lacking the N-terminal, head-binding domain
Martina Danner, Albert Fuchs, Stefan Miller, Robert Seckler 653–661

Electrostatic evidence for the activation of the glutathione thiol by Tyr7 in π-class glutathione transferases
Andrej Karshikoff, Peter Reinemer, Robert Huber, Rudolf Ladenstein 663–670

cDNA nucleotide sequence and primary structure of mouse uterine peptidylarginine deiminase – Detection of a 3′-untranslated nucleotide sequence common to the mRNA of transiently expressed genes and rapid turnover of this enzyme's mRNA in the estrous cycle
Mamoru Tsuchida, Hidenari Takahara, Naoko Minami, Tomoji Arai, Yoshimi Kobayashi, Hiroaki Tsujimoto, Chikafusa Fukazawa, Kiyoshi Sugawara 677–685

Molecular evolution of biotin-dependent carboxylases
Hiroyuki Toh, Hiroki Kondo, Tadashi Tanabe 687–696

Subunit composition, crystallization and preliminary crystallographic studies of the *Desulfovibrio gigas* aldehyde oxidoreductase containing molybdenum and [2Fe-2S] centers
Maria J. Romão, Belarmino A. S. Barata, Margarida Archer, Karin Lobeck, Isabel Moura, Maria A. Carrondo, Jean LeGall, Friedrich Lottspeich, Robert Huber, José J. G. Moura 729–732

Sequence of extracellular mouse protein BM-90/fibulin and its calcium-dependent binding to other basement-membrane ligands
Te-Cheng Pan, Matthias Kluge, Rui-Zhu Zhang, Ulrike Mayer, Rupert Timpl, Mon-Li Chu 733–740

Multiphasic denaturation of glutathione transferase B1-1 by guanidinium chloride – Role of the dimeric structure on the flexibility of the active site
Paolo Sacchetta, Antonio Aceto, Tonino Bucciarelli, Beatrice Dragani, Stella Santarone, Nerino Allocati, Carmine Di Ilio 741–745

Structural similarity between lung surfactant protein D and conglutinin – Two distinct, C-type lectins containing collagen-like sequences
Jinhua Lu, Hanna Wiedemann, Uffe Holmskov, Steffen Thiel, Rupert Timpl, Kenneth B. M. Reid 793–799

Nitric oxide synthase – Structural studies using anti-peptide antibodies
Valentina Riveros-Moreno, Christopher Beddell, Salvador Moncada 801–808

Pigments induce folding of light-harvesting chlorophyll *a/b*-binding protein
Harald Paulsen, Bärbel Finkenzeller, Nicola Kühlein 809–816

Characterization of the haem environment in *Methylophilus methylotrophus* ferricytochrome *c*″ by ^{1}H-NMR
Helena S. Costa, Helena Santos, David L. Turner 817–824

Enzymology

Detection of the *in vivo* incorporation of a metal cluster into a protein – The FeMo cofactor is inserted into the FeFe protein of the alternative nitrogenase of *Rhodobacter capsulatus*
Ute Gollan, Klaus Schneider, Achim Müller, Kerstin Schüddekopf, Werner Klipp 25–35

Effect of bromoconduritol on glucosidase II from rat liver – A new kinetic model for the binding and hydrolysis of the substrate
Josefa María Alonso, Angelines Santa-Cecilia, Pedro Calvo 37–42

Purification and characterization of guinea pig gastric phospholipase A_2 of the pancreatic type
Hiromasa Tojo, Zhao Ying, Mitsuhiro Okamoto 81–90

Cloning and expression of phospholipase A_2 from guinea pig gastric mucosa, its induction by carbachol and secretion *in vivo*
Zhao Ying, Hiromasa Tojo, Yasuki Nonaka, Mitsuhiro Okamoto 91–97

Human-immunodeficiency-virus transmembrane glycoprotein gp41 is an amino acceptor and donor substrate for transglutaminase *in vitro*
Loredana Mariniello, Carla Esposito, Prospero Di Pierro, Anna Cozzolino, Pietro Pucci, Raffaele Porta 99–104

Synthesis of 3-arsonoalanine and its action on aspartate aminotransferase and aspartate ammonia-lyase – Comparison with arsenical analogues of malate and fumarate
Bassam R. S. Ali, Henry B. F. Dixon 161–166

Increase of specificity of RNase from *Bacillus amyloliquefaciens* (barnase) by substitution of Glu for Ser57 using site-directed mutagenesis
Gennady I. Yakovlev, Gennady P. Moiseyev, Nina K. Struminskaya, Elena R. Romakhina, Inna B. Leshchinskaya, Robert W. Hartley 167–170

Dimeric forms of cholinesterase in *Sipunculus nudus*
Vincenzo Talesa, Giovanni B. Principato, Elvio Giovannini, M. Vittoria Di Giovanni, Gabriella Rosi 267–275

The isopenicillin-N acyltransferase of *Penicillium chrysogenum* has isopenicillin-N amidohydrolase, 6-aminopenicillanic acid acyltransferase and penicillin amidase activities, all of which are encoded by the single *penDE* gene
Emilio Alvarez, Boudewijn Meesschaert, Eduardo Montenegro, Santiago Gutiérrez, Bruno Díez, Jose L. Barredo, Juan F. Martín 323–332

Monoclonal antibodies against brain acetylcholinesterases which recognize the subunits bearing the hydrophobic anchor
Jian Liao, Vibeke Mortensen, Bent Nørgaard-Pedersen, Claus Koch, Urs Brodbeck 333–340

L-Serine and L-threonine dehydratase from *Clostridium propionicum* – Two enzymes with different prosthetic groups
Antje E. M. Hofmeister, Reiner Grabowski, Dietmar Linder, Wolfgang Buckel 341–349

Extensive accumulation of an extracellular L-amino-acid oxidase during gametogenesis of *Chlamydomonas reinhardtii*
Olivier Vallon, Laurence Bulté, Richard Kuras, Jacqueline Olive, Francis-André Wollman 351–360

Purification and properties of an iron-sulfur and FAD-containing 4-hydroxybutyryl-CoA dehydratase/vinylacetyl-CoA Δ^3-Δ^2-isomerase from *Clostridium aminobutyricum*
Uwe Scherf, Wolfgang Buckel 421–429

Enzymes of a novel autotrophic CO_2 fixation pathway in the phototrophic bacterium *Chloroflexus aurantiacus*, the 3-hydroxypropionate cycle
Gerhard Strauss, Georg Fuchs 633–643

Purification and characterisation of D-glucose oxidase from white-rot fungus *Pleurotus ostreatus*
Kwang-Soo Shin, Hong-Duk Youn, Young-Hoon Han, Sa-Ouk Kang, Yung Chil Hah 747–752

Reaction of imidazole-citrate-deformed glycogen phosphorylase with amino acids
Peng Pan, Reinhard Schinzel, Dieter Palm, Philipp Christen 761–766

Interaction of myeloperoxidase with peroxynitrite – A comparison with lactoperoxidase, horseradish peroxidase and catalase
René Floris, Sander R. Piersma, Guang Yang, Peter Jones, Ron Wever 767–775

Inactivation of interleukin-6 *in vitro* by monoblastic U937 cell plasma membranes involves both protease and peptidyl-transferase activities
Amale Laouar, Christian Villiers, Josiane Sancéau, Christel Maison, Maurice Colomb, Juana Wietzerbin, Brigitte Bauvois 825–831

Steady-state kinetics and analysis of pH dependence on wild-type and a modified allosteric *Pseudomonas aeruginosa* ornithine carbamoyltransferase containing the replacement of glutamate 105 by alanine
Catherine Tricot, Van Thanh Nguyen, Victor Stalon 833–839

Stereochemistry of the reaction catalysed by 2-aminoethylphosphonate aminotransferase – A ^{1}H-NMR study
Anne-Marie Lacoste, Catherine Dumora, Laurence Balas, Friedrich Hammerschmidt, Joseph Vercauteren 841–844

Protein *O*-mannosylation in *Candida albicans* – Determination of the amino acid sequences of peptide acceptors for protein *O*-mannosyltransferase
Anthony Weston, Pamela M. Nassau, Charlotte Henly, Michael S. Marriott 845–849

Carbohydrates, lipids and other natural products

Structural study of the oligosaccharide moieties of sphingolipid activator proteins, saposins A, C and D obtained from the spleen of a Gaucher patient
Keita Ito , Noriko Takahashi, Akira Takahashi, Ichio Shimada, Yoji Arata, John S. O'Brien, Yasuo Kishimoto 171–179

The existence of two mitochondrial isoforms of 2,4-dienoyl-CoA reductase in the rat
Elina H. Hakkola, J. Kalervo Hiltunen 199–204

Primary structure of human milk octa-, dodeca- and tridecasaccharides determined by a combination of ^{1}H-NMR spectroscopy and fast-atom-bombardment mass spectrometry – Evidence for a new core structure, the *para*-lacto-*N*-octaose
Sophie Haeuw-Fievre, Jean-Michel Wieruszeski, Yves Plancke, Jean-Claude Michalski, Jean Montreuil, Gérard Strecker 361–371

Kinetics of cytochromes *P*-450 IA1 and IIB1 in reconstituted systems with dilauroyl- and distearoyl-glycerophosphocholine
Walter G. Balvers, Marelle G. Boersma, Cees Veeger, Ivonne M. C. M. Rietjens 373–381

^{1}H-NMR study of reduced heme proteins myoglobin and cytochrome *P*450
Lucia Banci, Ivano Bertini, Simonetta Marconi, Roberta Pierattelli 431–437

Stereospecificity of the interaction of porcine pancreatic phospholipase A_2 with micellar and monomeric inhibitors – A time-resolved fluorescence study of the tryptophan residue
Michel Vincent, Anne-Mieke Deveer, Gerard H. de Haas, Hubertus M. Verheij, Jacques Gallay 531–539

Purification and characterization of *N*-glycolylneuraminic-acid-specific lectin from *Scylla serrata*
Sister P. D. Mercy, Mepur H. Ravindranath 697–704

Cholesterol 7α-hydroxylase is up-regulated by the competitive inhibitor 7-oxocholesterol in rat liver
Olof Breuer, Elly Sudjana-Sugiaman, Gösta Eggertsen, John Y. L. Chiang, Ingemar Björkhem 705–710

Teichoic acid and lipoteichoic acid of *Streptococcus pneumoniae* possess identical chain structures – A reinvestigation of teichoid acid (C polysaccharide)
Werner Fischer, Thomas Behr, Rudolf Hartmann, Jasna Peter-Katalinić, Heinz Egge 851–857

Structures of the glycopeptidolipid antigens of two animal pathogens: *Mycobacterium senegalense* and *Mycobacterium porcinum*
Luz María López Marín, Marie-Antoinette Lanéelle, Danielle Promé, Mamadou Daffé 859–866

Membranes and bioenergetics

Equilibrium and transient kinetic studies of the binding of cytochalasin B to the L-arabinose–H^+ symport protein of *Escherichia coli* – Determination of the sugar binding specificity of the L-arabinose–H^+ symporter
Adrian R. Walmsley, Kathleen R. Petro, Peter J. F. Henderson 43–54

Docking the mitochondrial inhibitor protein IF_1 to a membrane receptor different from the F_1-ATPase β subunit
Casilda Lopez-Mediavilla, Hélène Vigny, Catherine Godinot 487–496

Involvement of the ADP/ATP carrier in permeabilization processes of the inner mitochondrial membrane
Denise Vaz de Macedo, Maria de Fátima Nepomuceno, Lucia Pereira-da-Silva 595–600

A region of the C-terminal part of the 11-kDa subunit of ubiquinol-cytochrome-*c* oxidoreductase of the yeast *Saccharomyces cerevisiae* contributes to the structure of the Q_{out} reaction domain
Wieger Hemrika, Jan A. Berden, Leslie A. Grivell 601–609

Microenvironment changes in human blood platelet membranes associated with binding of tissue-type plasminogen activator
Cezary Watala, Tadeusz Pietrucha, Krzysztof Gwozdzinski, Urszula Kralisz, Czeslaw S. Cierniewski 867–871

Molecular cell biology and metabolism

5-Lipoxygenase-activating protein stimulates the utilization of arachidonic acid by 5-lipoxygenase
Mark Abramovitz, Elizabeth Wong, Martha E. Cox, Christopher D. Richardson, Chun Li, Philip J. Vickers 105–111

Inhibition of hepatocytic autophagy by okadaic acid and other protein phosphatase inhibitors
Ingunn Holen, Paul B. Gordon, Per O. Seglen 113–122

A high-order structure of plant storage proprotein allows its second conversion by an asparagine-specific cysteine protease, a novel proteolytic enzyme
Masayoshi Muramatsu, Chikafusa Fukazawa 123–132

Cell-cell adhesion by homophilic interaction of the neuronal recognition molecule axonin-1
Christoph Rader, Esther T. Stoeckli, Urs Ziegler, Thomas Osterwalder, Beat Kunz, Peter Sonderegger 133–141

Rapid dephosphorylation of microtubule-associated protein 2 in the rat brain hippocampus after pentylenetetrazole-induced seizures
F. Javier Díez-Guerra, Jesús Avila 181–187

Overproduction of *S*-adenosylmethionine decarboxylase in ethylglyoxal-bis(guanylhydrazone)-resistant mouse FM3A cells
Toshikazu Suzuki, Yasuyo Sadakata, Keiko Kashiwagi, Kenji Hoshino, Yoshimi Kakinuma, Akira Shirahata, Kazuei Igarashi 247–253

Analysis of the resistance to heat and hydrogen peroxide stresses in COS cells transiently expressing wild type or deletion mutants of the *Drosophila* 27-kDa heat-shock protein
Patrick Mehlen, Jérome Briolay, Leila Smith, Chantal Diaz-Latoud, Nathalie Fabre, Daniel Pauli, Andre-Patrick Arrigo 277–284

Regulation of malic-enzyme-gene expression by cAMP and retinoic acid in differentiating brown adipocytes
Arturo Hernandez, Custodia Garcia-Jimenez, Pilar Santisteban, María J. Obregon 285–290

Characterization of immunoreactive octapeptides of human-cytomegalovirus gp58
Allesandra Bonci, Luisa Bracci, Cinzia Caudai, Luisa Lozzi, Donatella Moschettini, Neri Niccolai, Maria Scarselli, Pier Egisto Valensin, Paolo Neri 383–387

Rat brain cytosol contains a factor which reconstitutes guanine-nucleotide-binding-protein-regulated phospholipase-D activation in HL60 cells previously permeabilized with streptolysin O
Blandine Geny, Amanda Fensome, Shamshad Cockcroft 389–396

cDNA cloning of the sodium-influx-stimulating peptide in the mollusc, *Lymnaea stagnalis*
August B. Smit, Steven F. T. Thijsen, Wijnand P. M. Geraerts 397–400

Two salmon neuropeptides encoded by one brain cDNA are structurally related to members of the glucagon superfamily
David B. Parker, Imogen R. Coe, Gordon H. Dixon, Nancy M. Sherwood 439–448

Cell swelling and the sensitivity of autophagic proteolysis to inhibition by amino acids in isolated rat hepatocytes
Alfred J. Meijer, Lori A. Gustafson, Joost J. F. P. Luiken, Pietjan J. E. Blommaart, L. Heleen P. Caro, George M. van Woerkom, Claire Spronk, Louis Boon 449–454

Distinct mechanisms of phospholipase D activation and attenuation utilized by different mitogens in NIH-3T3 fibroblasts
Pazit Ben-Av, Yona Eli, Uta-Susanne Schmidt, Karin E. Tobias, Mordechai Liscovitch 455–463

The bis(adenosin-N^6-yl) alkanes, a family of potential dinucleoside polyphosphate analogue precursors – Mechanism of growth inhibition and suppression of adenosine toxicity in lymphoid cells
Haijuan Chen, Alexander G. McLennan 465–471

The glucagon-insulin antagonism in the regulation of cytosolic protein binding to the 3′ end of phospho*enol*pyruvate carboxykinase mRNA in cultured rat hepatocytes – Possible involvement in the stabilization of the mRNA
Bruno Christ, Annegret Nath 541–547

Abundance and subcellular distribution of GTP-binding proteins in 3T3-L1 cells before and after differentiation to the insulin-sensitive phenotype
Christine Huppertz, Annette Schürmann, Hans-Georg Joost 611–617

Retrobiosynthetic analysis of carbon fixation in the phototrophic eubacterium *Chloroflexus aurantiacus*
Wolfgang Eisenreich, Gerhard Strauss, Udo Werz, Georg Fuchs, Adelbert Bacher 619–632

Estrogen-inducible pS2 protein is not the key regulatory component in the proliferation of human breast cancer cells (MCF-7)
Noriyoshi Kida, Tomoaki Yoshimura, Haruo Takahashi, Seiji Nagao, Yoshinori Nozawa, Yoshiko Furukawa, Kazutoshi Mori, Kyozo Hayashi 671–676

Transduction of reducing power across the plasma membrane by reduced glutathione – A ^{1}H-NMR spin-echo study of intact human erythrocytes
Maria R. Ciriolo, Maurizio Paci, Marco Sette, Angelo De Martino, Argante Bozzi, Giuseppe Rotilio 711–718

Feedback regulation of mammalian ornithine decarboxylase – Studies using a transient expression system
Eva Lövkvist, Louise Stjernborg, Lo Persson 753–759

Effect of cell attachment and growth on the synthesis and fate of dolichol-linked oligosaccharides in Chinese hamster ovary cells
René Cacan, Odette Labiau, Anne-Marie Mir, André Verbert 873–881

Glucose administration induces the premature expression of liver glucokinase gene in newborn rats – Relation with DNase-I-hypersensitive sites
Pascale Bossard, Ramine Parsa, Jean-Francois Decaux, Patrick Iynedjian, Jean Girard 883–892

Properties of some nuclear nucleases of rat thymocytes and their changes in radiation-induced apoptosis
Larisa V. Nikonova, Igor P. Beletsky, Samuil R. Umansky 893–901

Ciprofibrate, a carcinogenic peroxisome proliferator, increases the phosphorylation of epidermal-growth-factor receptor in isolated rat hepatocytes
Ariel Orellana, Loreto Holuigue, Perla C. Hidalgo, Víctor Faúndez, Alfonso González, Miguel Bronfman 903–906
